

Well-being

The goal is for all employees to have a high sense of well-being all the time. For Castellum, this is a matter of promoting health, well-being and improved productivity, and its operations being characterised by equal opportunity and diversity.

Castellum's commitment

We will promote health, wellness and productivity.

Core values provide guidance in daily life

Castellum's core values – the Castellum Spirit – provide guidance in day-to-day activities and various business situations concerning what is expected of an employee at the company, and how we should conduct ourselves towards each other in the company.

A flexible workplace

Work life as a whole is facing a revolution that Castellum intends to best meet through also practising change in its own operations. Issues of working remotely, flexibility and balance between work and leisure have been on the agenda for some time. When the pandemic broke out, the company introduced remote working for many employees, which it sees as an important supplement to the office going forward as well, especially to reduce commuting to work.

Castellum is part of a research partnership with KTH Royal Institute of Technology, RISE IVT, Gothenburg University and Scania, the purpose of which is to study how the lessons from the pandemic regarding flexible work can be transformed into best practice once the pandemic is over.

A workplace where everyone has high sense of well-being

Health and safety, as well as a positive work environment, are priorities at Castellum. The objective is a healthy workplace free of accidents. Using a structured approach, the company is working proactively to boost employee health, prevent risks and avoid work-related accidents.

Castellum takes care of its employees. The company continually conducts various wellness-related activities in the form of group exercise as well as interactive activities and challenges that encourage movement. All employees are offered a yearly wellness allowance of SEK 5,000 and regular health check-ups, as well as advantageous health care insurance for both employees and their respective families. Wellness activities are both preventative and rehabilitating, with the aim of promoting continued well-being.

Short-term sick leave at the company remains low, equivalent to 1.1% (0.9), of which 1.1% (0.8) for women and 1.1% (1.0) for men. Total sick leave remained low, at 2.9% (2.0). Castellum protects and supports employees, suppliers and contractors, and it is our responsibility that no one becomes ill, either physically or mentally, or is injured owing to their work. The company works routinely on developing and improving working environments within the entire Group. The occurrence of work-related injuries is very low, equivalent to 1.7 (1.2) injuries per 200,000 hours worked. Injury figures are low for Castellum's suppliers and contractors as well, with 11 (6) work-related injuries reported for the year.

Examples of workplace injuries among employees:

- Crush injuries
- Sprains and bone injuries
- Injuries sustained during the commute to and from work

Examples of workplace injuries among suppliers and contractors:

- Falls
- Cuts
- Broken bones
- Crush injuries
- Burns

Castellum's values

- Personal
- Proactive
- Passionate
- Reliable

Diversity and Equal Opportunity

For Castellum, it is important that its operations are characterised by equal opportunity, diversity and equal rights for all. By 2025, the company will have achieved a long-term gender equality balance in all positions and the share of coworkers with international backgrounds will have increased to 20% so as to reflect the actual composition of our communities over the long term.

Well-being, cont.

Working environment

Castellum protects and supports both employees and suppliers, and it is our responsibility that no one becomes ill, either physically or mentally, or is injured owing to their work.

We work routinely on developing and improving working environments within the entire Group. Castellum also has a Code of Conduct for suppliers, in which they are obligated to meet the same requirements we impose on ourselves as regards work environments. During the year, 18 work-related accidents (11) were reported, 7 (5) of which involved Castellum employees. Total sick leave remained low, at 2.9% (2.0).

To reach the Group's tough sustainability goals of net-zero carbon emissions by 2030 and maintain a non-fossil fuel powered vehicle fleet, Castellum's employees must prioritise sustainable travel and meetings. Castellum's guidelines include the following requirements:

- Travel over 450 km should primarily be booked by train.
- Environmental requirements are imposed on all travel (e.g. green taxis should be booked).
- Annual climate compensation for all of the Group's travel.

Occupational health and safety

(GRI 403-1, 403-2, 403-3, 403-4, 403-5, 403-6, 403-7)

Castellum's procedures for occupational health and safety cover all its employees. Systematic occupational health and safety work is based on a work environment handbook with policies, guidelines and procedures that is available to all employees on the intranet. All employees are covered by Castellum's systematic health and safety work, and training is continual both in accordance with plans and as needed. Castellum assumes its statutory work environment responsibility for all of its employees and agency staff, and assumes coordinating responsibility for contractors in our operations.

Terms: LTI = Lost Time Injury, LTIFR = Lost Time Injury Frequency Rate, TRIFR = Total Recordable Injury Frequency Rate.

1. Serious injuries with more than 6 months of recovery, excl. fatalities.

2. Castellum's interpretation of GRI's "Work-related ill health".

3. The number of hours worked for suppliers is based on an assumption that 60% comprises labour costs at an hourly price of SEK 500.

4. The key metrics were first measured in 2020.

Well-being, cont.

The work environment handbook indicates how the responsibility and work environment tasks are allocated. The regional managing directors of the various parts of the operation bear primary responsibility. The regional managing directors delegate work environment tasks to the operations so that one or more managers, supervisors or other employees are tasked with working to prevent risks in the work and to achieve a satisfactory work environment. Employees or employers who are or have been assigned responsibility for work environment tasks must ensure that the knowledge concerning the work is sufficient, which is also defined in Castellum's work environment handbook. The company's local safety officers have an important function in occupational health and safety work, and in cooperating to develop Castellum's work environment. Courses in occupational health and safety are continually held in the operation.

Risk identification and management

Identifying and preventing risks to health and safety are the foundation of Castellum's occupational health and safety work. Risks are assessed at different levels and in specific situations. For example, risks are reviewed and a renewed risk assessment is conducted for every part of operations on an annual basis. Risk assessments are also conducted in conjunction with changes (e.g. moving premises, new tools, changes to working methods or prior to hiring a contractor).

Castellum's workplace-related incidents and accidents are handled according to established procedures. If an employee suffers an occupational injury or gets into an accident at work, or if some near-accident occurs at work, the managing director of the operation concerned, the manager concerned and the HR director – as well as the employee – will investigate the causes so that the risk of ill health and accidents can be prevented in the future and, if needed, routines and approaches for minimising risks can be changed.

The regional managing directors of the operation concerned, or alternately the manager concerned, must report the occurrence to the Swedish Work Environment Authority without delay. The regional managing directors of the operation concerned are also responsible

for reporting work-related injuries to Castellum's legal department. The documentation will be used in the systematic health and safety work so as to prevent future accidents.

At Castellum, the safety officers have the right to intervene and stop work that is deemed to be dangerous or could entail a risk of injury or ill-health. In Castellum's projects, near-accidents and accidents must also be reported for the purpose of learning from the experience. Our hired contractors are formally responsible, in their capacity as employers, to investigate and implement measures in conjunction with workplace injuries. It is the task of Castellum as property developer, however, to draw lessons from what took place in order to apply actions in conjunction with planning and designing projects as well as regards overall conditions for the project. Castellum's employees have a great deal of influence over the company's work environment and health initiatives. The safety officers have an important role in this. Influence is exercised through measures such as participation in risk assessments, safety committees, physical fitness groups and more. At Castellum, there are local safety committees that both employer and employee representatives take part in.

Health Care

For Castellum, healthy employees who feel good and live healthy lifestyles are important. Lifestyle, and the physical and social environment, are crucial for people's health and wellness both in leisure time and work life.

Castellum makes use of external resources for occupational health services, starting from the fact that expert knowledge is necessary to study and assess the potential physical and mental risks. Occupational health care proposes measures and takes part in implementing them. It is also an important resource when rehabilitation studies are to be conducted and in conjunction with work adaptation measures for individual employees and groups of employees. It may be a question of employees who face challenges in the physical work environment, for example, with unbalanced work. Health checks are conducted throughout the company once per year, and more time is scheduled when needed. The purpose of

occupational health care is to work in a manner that promotes health and is preventive, in accordance with the intent of the Swedish Work Environment Act.

Through their healthcare insurance, all employees have access to several preventive health service such as telephone support and e-health services, which are free of charge to use and are available round the clock. In order to provide every employee with the proper conditions to care for their health, all employees are offered work environment and health check-ups at certain intervals.

To inspire our employees, Castellum has a physical fitness group that continually develops activities that our employees are invited to. Every year, our physical fitness group develops a plan with various physical fitness activities that are carried out around the company. Every employee also has access to a physical fitness subsidy of SEK 5,000 per year.

Preventive work with suppliers

Castellum's operations encompass many buildings and large areas of land around the Nordic region. To achieve effective administration and construction, Castellum needs to partner with many different suppliers. Partnership with suppliers is built on such factors as clear requirements and expectations, as well as dialogue and monitoring. By imposing clear requirements in areas such as work environment, we can enable and promote sustainable development for the entire construction and property industry. The Code of Conduct for suppliers, clear requirements in procurement documents, and instructions for suppliers are a few examples of how Castellum takes on these issues.

Work-related injuries and ill health (GRI 403-9, 403-10)

During the year, a total of 7 workplace accidents (5) were reported for Castellum's own employees. The most common accidents were crushing injuries, falls and injuries owing to sub-operations. The number of injuries resulting in sick leave (LTI) yields an accident rate of 0.5 (0.5) per 200,000 hours worked, which is considered low. The accident rate is defined as the number of workplace accidents that lead to absence on one or more contractual workdays per 200,000 hours worked.

Sick leave in the company remains low and continues to hold steady at 2.9% (2.0). Our time-reporting system for registering sick leave provides us with the opportunity for early identification of employees who are experiencing work-related ill health. During the year, 13 employees (7) indicated that their absences were a consequence of conditions at work. Those who suffered workplace injuries with absence as a result are here. In addition, there is ill health as consequence of stress. We work continually with health-promoting and preventive activities for the purpose of preventing employees from suffering work-related injuries and ill health. We work in accordance with a structure similar to a “hierarchy of controls” in order to prevent and reduce the risk of injury.

Castellum has established targets for forward-looking occupational health and safety work:

- Short-term sick leave must be under 2%.
- Long-term sick leave must be under 3%.
- Zero workplace injuries and work-related illness among employees and suppliers.
- All managers must have undergone systematic occupational health and safety training for the purpose of possessing the knowledge required for the responsibility they have been delegated.
- Safety committee meetings must be held every three months.
- Psychosocial work environment issues must be followed up annually via questions in temperature measurements, which were introduced during the year. Targets for psychosocial issues will be followed up on in 2021.

Castellum has procedures for recording and investigating work-related illnesses in order to establish the underlying causes and to develop preventive strategies. Among our suppliers, 5 workplace injuries (4) resulting in absence were reported during the year. This yields an accident rate of 0.15 per 200,000 hours worked, which from an industry perspective can be considered low. The accident rate is defined as the number of workplace accidents that lead to absence on one or more workdays per 200,000 hours worked. No fatalities have occurred, which is why we did not divide fatalities according to workplace illness or workplace accidents, nor is any fatality rate reported.

Performance and career development review (GRI 404-3, Emp-Dev)

Performance and career development reviews are conducted on a regular basis to set individual goals and identify any needs for competence development. All employees are offered performance and career development reviews. In the course of 2021, 91% (93) of all employees took part in performance and career development reviews, of which 93% (89) were women and 89% (95) were men. Castellum does not break down performance and career development reviews by occupational category, as the company does not have access to this information at the individual level. The information may be developed in the next few years with a Group-wide HR system.

Sick leave, employees (GRI 403-10)

	2021			2020		
	Women	Men	Total	Women	Men	Total
Absenteeism, Castellum	3.3%	2.6%	2.9%	2.1%	2.0%	2.0%
Of which short-term sick leave	1.1%	1.1%	1.1%	0.8%	1.0%	0.9%
Of which long-term sick leave (counted after day 15)	2.2%	1.5%	1.8%	1.3%	1.0%	1.1%

Performance and career development review (GRI 404-3, Emp-Dev)

	2021			2020		
	Women	Men	Total	Women	Men	Total
Performance and career development reviews conducted (Emp-Dev)	93%	89%	91%	89%	95%	93%

Castellum does not break down performance and career development reviews by occupational category, as the company does not have access to this information. The information may be developed in the next few years with a Group-wide HR system.
